

## **Hidden groundwater resource under pressure in southern England**

The UK has had less rainfall than usual over the winter, and the south and south-east have been particularly dry meaning that the risk of a drought is increased. New maps published by the BGS illustrate that people in the south and south-east of England are especially reliant on groundwater for their water supply and this provides some resilience to drought.

## **Jurassic Coast map drains the sea to reveal geology**

Scientists from the British Geological Survey (BGS) and University of Southampton have published a seamless onshore-offshore bedrock geology map of the eastern half of the Jurassic Coast World Heritage Site.
