

Haiti: New grant to help UNICEF strengthen efforts to tackle cholera

22 February 2017 – A new grant from the Government of Japan will allow the United Nations Children’s Fund (UNICEF) to help reduce cholera-related morbidity and mortality in Haiti in 2017 and 2018, the UN agency said in a news release.

“With this gift from the Japanese people, we will strengthen the axes of the fight against cholera in the protection of the Haitian population, especially children,” said Marc Vincent, UNICEF Representative in Haiti, welcoming the contribution.

“Japan is a key partner and we thank the Japanese people for their continued support,” he added.

Haiti has been dealing with a cholera outbreak since October 2010, some nine months after it suffered a devastating earthquake. The outbreak has affected an estimated 788,000 people and claimed the lives of more than 9,000. Concerted national and international efforts, backed by the United Nations, have resulted in a 90 per cent reduction in the number of suspected cases.

The \$2.6 million grant (nearly 300 million Japanese yen) will help strengthen the island nation’s epidemiological coordination and surveillance; and support conducting timely surveys, rapid response teams and case management, as well as improving and increasing awareness of cholera-related hygiene.

According to UNICEF, the cholera epidemic in Haiti continues to be the largest in the western hemisphere. More than 41,000 suspected cases of cholera have been reported throughout Haiti in 2016.

With the new funds, interventions will be implemented across the island nation with an emphasis on the cholera-prone departments of Center, North, West, Grand’Anse, Sud (South), and Artibonite.

Two of these departments – Grand’Anse and Sud – were where Hurricane Matthew made landfall in early October, inflicting much devastation as it cut a path of destruction through country.

In the news release, the Ambassador of Japan to Haiti, Yoshiaki Hatta, said that the grant had been decided upon a resurgence in suspected cholera cases resulting from the deterioration of the sanitary and hygiene situation caused by rainy seasons or natural disasters.

Japan considers that this issue should be addressed in collaboration with the Government of Haiti and the international community, the Ambassador added, expressing appreciation for UNICEF, and calling on all stakeholders to strengthen their collaboration in the fight against cholera.

Meanwhile, a Multi Partner Trust Fund (MPTF) for the UN Haiti Cholera

Response has been set up to enable Member States, other partners and individuals (including UN staff) to contribute. To date, it has received funds from five Member States: Chile (\$250,000); France (\$638,000); India (\$100,000); Republic of Korea (\$1 million); and Liechtenstein (\$50,000).

As for other resources provided outside of the Trust Fund, Canada has made a \$4,600,000 parallel contribution in support of the UN Haiti Cholera Response – with some of the funds going to UNICEF & PAHO.

Business-as-usual not an option with future global food security in jeopardy, cautions UN agency

22 February 2017 – Warning that diminishing natural resources and a changing climate have put humankind's future ability to feed itself "in jeopardy," the United Nations underlined today that while the planet still has the potential to produce enough food, "major transformations" are needed to make production sustainable and to ensure that all of humanity benefits.

In The Future of Food and Agriculture: Trends and Challenges report, the UN Food and Agriculture Organization (FAO) highlights that while "very real and significant" progress in reducing hunger has been achieved over the past 30 years, these have often come at a heavy cost to nature.

"Almost half of the forests that once covered the Earth are now gone. Groundwater sources are being depleted rapidly. Biodiversity has been deeply eroded," noted the report.

"[As a result,] planetary boundaries may well be surpassed, if current trends continue," added FAO Director-General José Graziano da Silva, underlining the gravity of the situation.

With global population estimated to reach 10 billion by 2050, world-wide demand for agricultural products could be pushed by as much as 50 per cent above current levels, intensifying pressures on already-strained natural resources.

At the same time, the report argues, greater numbers of people will be eating fewer cereals and larger amounts of meat, fruits, vegetables and processed food – a result of an ongoing global dietary transition that will further add to those pressures, driving more deforestation, land degradation and greenhouse gas emissions.

According to FAO, without a push to invest in and reorganizing food systems, far too many people will remain hungry in 2030 – the year by which the 2030

Agenda for Sustainable Development and its Sustainable Development Goals (SDGs) aim to eradicate chronic food insecurity and malnutrition.

“Without additional efforts to promote pro-poor development, reduce inequalities and protect vulnerable people, more than 600 million people would still be undernourished in 2030,” the report noted.

In fact, the current rate of progress would not even be enough to eradicate hunger by 2050, it added.

Climate change will affect every aspect of food production

On top of these challenges, climate change adds a new level of complexity. Its increasing impacts are leading to greater variability of precipitation and increasing the frequency of droughts and floods.

In the midst of this multifaceted issue, the UN agency is advocating for a shift to more sustainable food systems that make more efficient use of land, water and other inputs, and for sharply reducing the use of fossil fuels in agriculture.

Empowering small-scale farmers and providing them better access to information, markets and technologies is key to ensuring future food security. Photo: FAO

Reducing fossil fuel dependency will also help cut agricultural green-house gas emissions, conserve biodiversity, and reduce waste, it added.

Furthermore, investments in agriculture and agri-food systems, as well as in research and development, are needed to sustainably boost food production and help producers better cope with water scarcity and other climate change impacts.

The social dimension to food security

Also in the report, FAO has called for preserving and enhancing livelihoods of small-scale and family farmers, and ensuring access to food for the most vulnerable.

Amid the core challenge of having to produce more with less, it has underlined that the twin-track approach is needed to immediately tackle undernourishment, and that pro-poor investments in productive activities – especially agriculture and in rural economies – could sustainably increase income-earning opportunities of the poor.

In addition to boosting production and resilience, it is equally important to

create food supply chains that better connect farmers in low- and middle-income countries to urban markets.

“Major transformations in agricultural systems, rural economies and natural resource management will be needed if we are to meet the multiple challenges before us and realize the full potential of food and agriculture to ensure a secure and healthy future for all people and the entire planet,” read the report.

“Business-as-usual” is not an option.

[Humanitarian agencies seek \\$1 billion to provide life-saving aid to millions in northeast Nigeria – UN](#)

22 February 2017 – As relief organizations increase response to the humanitarian emergency in the north-east of Nigeria, timely donor support amounting to a little over \$1 billion is required to sustain life-saving assistance to millions people devastated by Boko Haram-linked violence, the United Nations relief aid wing has said.

“If the resources do not arrive in time, one in five children suffering severe acute malnutrition could die,” said Peter Lundberg, the Deputy Humanitarian Coordinator for Nigeria in a press release issued yesterday by the UN Office for the Coordination of Humanitarian Affairs (OCHA).

“The likelihood of a child with severe acute malnutrition surviving is nine times less than a properly nourished child,” he added.

According to OCHA, the eight-year-long conflict has left some 8.5 million people in need of humanitarian assistance in the worst-affected states of Nigeria’s north-east. In the coming months, around 5.1 million people will face severe food insecurity in the region, where some 1.8 million people have been displaced and millions are exposed to violence and abuse.

“Food assistance alone will cost \$1 million a day to avoid famine in a region where 450,000 children under five will suffer from severe acute malnutrition this year,” said Mr. Lundberg. “Sustained and timely financial support is needed to maintain the scale-up in operations desperately needed in the north-east of Nigeria.”

During a recent visit by representatives of 12 donor countries and agencies

to Borno state, in the run up to the 24 February Humanitarian Conference on Nigeria and Lake Chad region, they lauded the scale-up of humanitarian operations in the north-east and emphasized the need for more funding, a stance the humanitarian community in Nigeria concurs with.

“We are grateful to our donors who have enabled us scale up the response and appreciate their continued commitment. We look forward to receiving the needed resources to implement the 2017 Humanitarian Response Plan for Nigeria,” Mr. Lundberg said.

[At Security Council, UN chief Guterres highlights global significance of a peaceful Europe](#)

21 February 2017 – Noting that recent crises in Europe show that the continent remains at risk from new outbreaks of conflict, United Nations Secretary-General called for reinforcing mutual trust and respect to strengthen stability and cooperation both within Europe and beyond.

The Security Council meeting at which the UN chief delivered this message started with a moment of silence in memory of the Permanent Representative of Russia to the United Nations, Vitaly Churkin, who passed away yesterday.

“I think [the Ambassador’s] passing represents a deep loss for all of us in the UN, including in this Council, where his distinctive voice was ever-present for the past decade, and where, I think, we will all miss that voice in the sessions to come,” said Mr. Guterres in his tribute.

Turning to the subject at hand, the Secretary-General, who briefed the Council alongside Lamberto Zannier, the Secretary-General of the Organization for Security and Cooperation in Europe (OSCE), and Helga Schmid, Secretary-General, European External Action Service of the European Union (EU), said crises in Europe could also adversely impact economic progress and sustainable development.

“Conflict in Europe is not only a tragedy for those directly involved: those killed, injured, displaced, who have lost loved ones, who may be unable to access healthcare and are missing vital years of their education,” Mr. Guterres said, adding: “It is also reversing development gains and preventing communities and societies from achieving their full potential and contributing to regional and global prosperity.”

Noting that no single factor is responsible for the emergence and continuation of conflicts, he said that in many cases, peace agreements were “simply not being implemented.”

Other factors included challenges to democratic governance and the rule of law, and the manipulation of ethnic, economic, religious and communal tensions for personal or political gain.

“Whatever the causes may be, the inability of regional and international institutions, including our own, to prevent and resolve conflicts is seriously undermining their credibility and making it more difficult for them to succeed in future,” added the UN chief.

Speaking specifically on the conflict in Ukraine, Mr. Guterres said the UN remains committed to supporting a peaceful resolution, in a manner that fully upholds the sovereignty, territorial integrity and independence of Ukraine, and in accordance with relevant Security Council and General Assembly resolutions.

AUDIO: António Guterres was speaking in the Security Council during an open debate which looked at cooperation between the UN and regional bodies in responding resolving existing conflicts in Europe

He also noted that the UN fully supported the efforts within the Normandy Four, the Trilateral Contact Group, and the OSCE Special Monitoring Mission, and that it has repeatedly called for the full implementation by all sides of all of their commitments under the Minsk Process, both in letter and in spirit.

“I urge all stakeholders to avoid unilateral steps or attempts to create facts on the ground, which further complicate and endanger efforts to find negotiated settlements. This is especially relevant in view of the latest actions taken in relation to the conflicts in eastern Ukraine and the South Caucasus,” he highlighted, urging all sides to give the highest priority to protecting civilians.

In his remarks, Mr. Guterres also spoke of challenges to peace in other parts of Europe, such as in the Balkans, Cyprus, Georgia, Moldova and South Caucasus, as well as on the long-standing name issue between Greece and the former Yugoslav Republic of Macedonia.

He also noted new challenges and threats such as the phenomenon of populism, nationalism, xenophobia and violent extremism were both causes and effects of conflict.

“I encourage Member States, this Council, regional mechanisms and all stakeholders to intensify their efforts to define a peace and security agenda to address today’s complex challenges,” urged Secretary-General Guterres.

“The status quo is not sustainable.”

'We cannot give up the fight' to end child recruitment, says UNICEF chief

21 February 2017 – Even though over the past 10 years, more than 65,000 children have been released from armed forces and armed groups, tens of thousands of boys and girls under the age of 18 continue to be used in conflicts around the world, the United Nations Children's Fund (UNICEF) said today.

[It] is not only about looking back at what has been accomplished but looking forward to the work that remains to be done to support the children of war," said UNICEF Executive Director Anthony Lake as global leaders gather in the French capital on the anniversary of the Paris commitments to end the use of children in conflict.

Adopted 10 years ago, the Paris commitments, together with the Paris principles and guidelines, lay out guidance for protecting children from recruitment and use by armed forces or armed groups, and assisting their release and reintegration, with other vulnerable children affected by armed conflict in their communities.

According to UNICEF, exact data on the number of children used and recruited in armed conflict is difficult to ascertain because of the unlawful nature of child recruitment. But estimates indicate that tens of thousands under the age of 18 are used in conflicts worldwide.

For instance, since 2013 an estimated 17,000 children have been recruited in South Sudan and up to 10,000 have been recruited in the Central African Republic (CAR). Similarly, nearly 2,000 children were recruited by Boko Haram, in Nigeria and neighbouring countries, last year alone, and there have been nearly 1,500 cases of child recruitment in Yemen since the conflict escalated in March 2015.

There has also been progress: since it was adopted, the number of countries endorsing the Paris commitments has nearly doubled from 58 countries in 2007 to 105 at present, signalling an increasing global commitment to end the use of children in conflict.

Globally, more than 65,000 children have been released from armed forces and armed groups, including 20,000 in the Democratic Republic of the Congo (DR Congo); nearly 9,000 in the Central African Republic; and over 1,600 children in Chad.

But more needs to be done.

Seeking to build on the current momentum, the Paris International Ministerial Conference on the Protection of Children in Armed Conflicts is urging for unconditional release of all children without exception and putting an end to child recruitment.

It is also calling increased resources to help reintegrate and educate children who have been released, and urgent action to protect internally displaced children, child refugees and migrants.

As long as children are still affected by the fighting, we cannot give up the fight for the children," Mr. Lake added.
