A Work in Progress - Multi-material Mausolea Installation
Spring is here and our team enjoy the bright dry weather as they unload parts and commence the extension of this mausolea cemetery section. The daffodils wave cheerily as they work.

The Art of Manufacturing - Multi-material Cold Casting

Example images from the massive selection of our moulds used, and products created, through the cold casting process. Many different material types can be cast to create exciting effects.

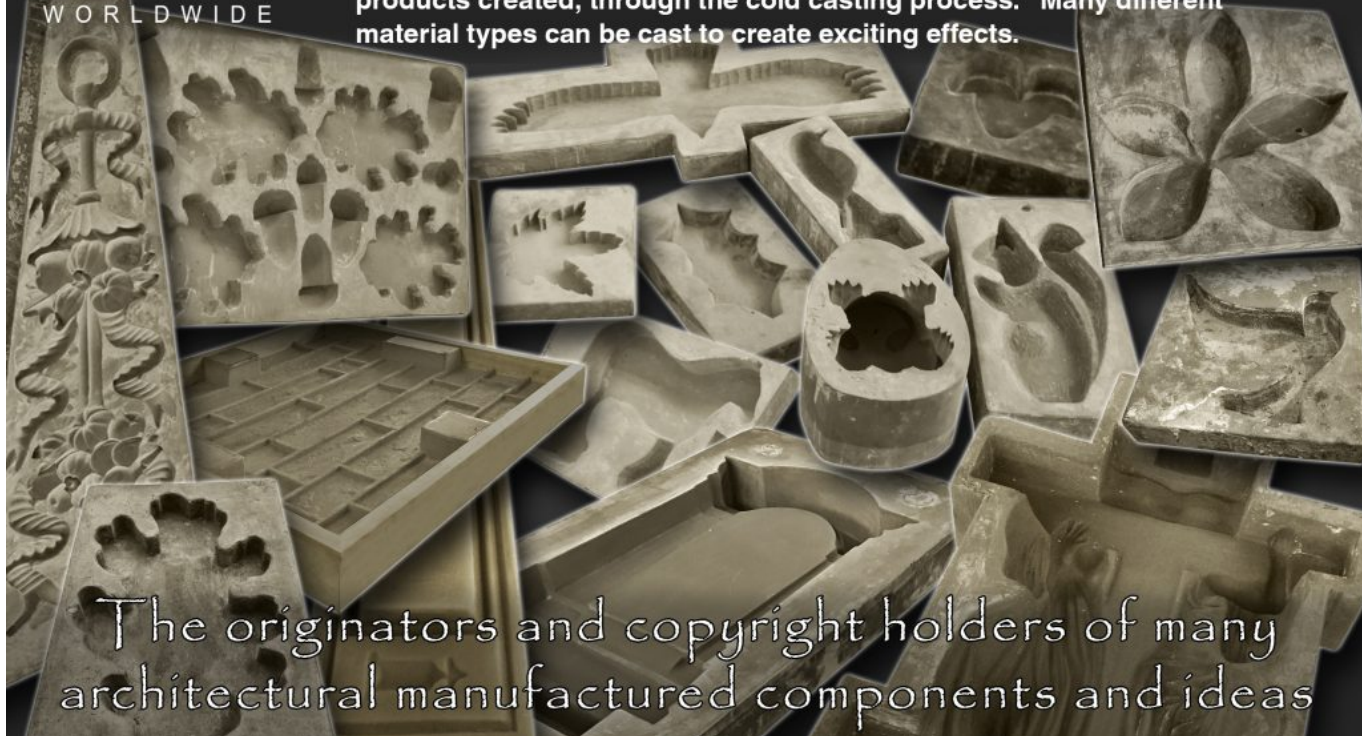

The originators and copyright holders of many architectural manufactured components and ideas

[welters Art of Manufacturing – a preview](#)

In anticipation of the updated welters Art of Manufacturing publication, first issued in 2012, we release these preview images. Made in Britain with the essential reuse of materials, we merge nature with technology, trade skills and manufacturing techniques to create Art and Function.

Designed to merge with and enhance the natural environment, our standing stones, both large and small, reuse materials of border stone to mirror the ancient stones and rock formations that have populated our planet for millennia. These architectural formations are previewed against example backgrounds from our temperate rainforest in the Scottish Borders. As the stones become established amongst nature, they will become home to mosses and insects, contributing to the wildlife and health of the area and helping to save our plant.
