

Manufacturing company fined after employee loses fingers

A manufacturing company has been fined after a worker's hand was damaged whilst carrying out machinery repairs.

Manchester Magistrates' Court heard how, on 27 July 2018, an employee of Preston Board and Packaging Limited was trying to repair a cardboard slitting machine. Whilst in the process of lifting a chain back onto a sprocket, a roller attached to the chain dropped to the base of the machine trapping his fingers under the chain, resulting in his left-hand ring finger and the tip of his middle finger being severed.

An investigation by the Health and Safety Executive (HSE) found there was no risk assessment or safe system of work in place for replacing/repairing safety wires and chains on the slitter machine.

Preston Board and Packaging Limited, Green Bank Street, Preston pleaded guilty to breaching section 2(1) of the Health and Safety at Work etc. Act 1974. The company was fined £33,500 and ordered to pay costs of £5,527.16.

HSE inspector Mike Lisle said after the hearing "This injury was easily preventable. The task had been carried out a number of times previously and the risks should have been identified. Employers should properly risk assess machinery operations then apply effective control measures and robust safe systems of work to minimise the risk to employees from dangerous parts of machinery".

Essex engineering firm sentenced after worker suffered serious hand injuries

An engineering firm was sentenced for safety breaches after a worker severed two fingers.

Chelmsford Magistrates' Court heard that on 5 June 2018 an employee of Essex Governor Services Limited was polishing a work piece with an emery cloth whilst it was rotating in a manual metal working lathe at the company site in Colchester. His index and middle finger were severed as they were dragged in between the tool and the chuck. He later had his index finger sewn back in the place of his middle finger, but the other one could not be saved.

An investigation by the Health and Safety Executive (HSE) found the unsafe practice of using emery cloths in this way was custom and practice at the site. Essex Governor Services Limited had failed to identify the risks associated with the activity and as a result these practices had continued over a significant period. In addition, employees and their supervisor had not been provided with adequate information, instruction and training to work safely on the lathes.

Essex Governor Services Limited of Wormingford Road, Fordham, Colchester, pleaded guilty to breaching section 2(1) of the Health and Safety at Work Act 1974. The company has been fined £24,000 and ordered to pay costs of £4414.48 and victim surcharge of £170.

After the hearing HSE inspector Carla Baron said; "This incident could have easily been avoided had appropriate training and supervision been in place.

"Companies should be aware that HSE will not hesitate to take appropriate enforcement action against those that fall below the current standards. In this particular case, there is well-known industry guidance published on the HSE website that prohibits the application of a cloth directly by hand on a rotating manual metal working lathe."
