

[News story: New identity checking guidelines](#)

New identity (ID) checking guidelines have been introduced for standard and enhanced disclosure checks. The [new guidelines](#) have been running in parallel with previous guidelines since October 2017. However, the previous guidelines now cease to apply and you must use the new version.

The change is being introduced so that the DBS's identity checking process is aligned with [right to work](#) checks. These state that employers must prevent illegal working in the UK by carrying out document checks on people before employing them to make sure they are allowed to work.

If you have any questions about the changes contact customerservices@dbsgsi.gov.uk.

[Press release: Local communities to give views on permanent disposal of radioactive waste](#)

- New consultations on a permanent solution for the disposal of the UK's radioactive waste launched today
- Geological disposal is internationally recognised and secures waste at least 200 metres underground
- Construction of disposal facilities will only take place if local communities give their consent

A safe, responsible, long-term solution for the permanent disposal of radioactive waste is the focus of 2 new consultations launched today by the government.

The UK has long generated radioactive waste most of which is low in radioactivity and is disposed of safely every day – from power stations to use in a range of industrial applications including medicine and defence. Some materials need more specialised disposal facilities and this waste is currently held safely in stores above ground. It is not sustainable to keep storing past and future waste on a temporary basis.

A Geological Disposal Facility (GDF) is internationally recognised as the safest and most secure way to permanently dispose of higher activity radioactive waste. This involves placing this waste at least 200 metres

underground in a highly engineered facility made up of multiple layers of materials such as steel, rock and clay to provide protection while some of the waste remains radioactive – ensuring that no harmful quantities of radioactivity ever reach the surface.

The construction of a GDF would also support a new generation of nuclear power stations in the UK, by providing a safe and secure way to dispose of the waste they produce. It will create up to 2,000 well-paid, skilled jobs and bring at least £8 billion to the UK economy over the lifetime of the facility.

Energy Minister Richard Harrington said:

We owe it to future generations to take action now to find a suitable permanent site for the safe disposal of our radioactive waste. And it is right that local communities have a say. Planning consent will only be given to sites which have local support.

Mr Harrington added:

As the government set out in our Industrial Strategy, the nuclear sector has a key role to play in increasing productivity and driving clean growth. Nuclear is a vital part of our energy mix, providing low carbon power now and into the future.

Professor Iain Stewart, Director of the Sustainable Earth Institute, Plymouth University, said:

A geological disposal facility is widely accepted as the only realistic way to dispose of higher activity nuclear waste for the long-term.

Geological disposal facilities are already being developed in Finland, Sweden, France, and Canada.

The first consultation, [Working with communities](#) sets out how the project developer will engage with people in areas that may be interested in hosting a disposal facility to seek their views and the second, on the proposed [National Policy Statement](#), will create a rigorous planning process.

Radioactive Waste Management Ltd (RWM) will deliver geological disposal on behalf of the government.

Ann McCall, Radioactive Waste Management's GDF Siting and Engagement Director, said:

Geological disposal will provide a safe, secure and long-term

solution to managing the UK's radioactive waste, and RWM welcomes the public consultations launched today which place communities at the heart of the process.

1. Both consultations will run for 12 weeks. The Working with Communities consultation will apply to England and Northern Ireland. The Welsh Government is conducting its own consultation on Working with Communities in parallel with the UK Government. The Scottish Government has its own policy on the management of radioactive waste.
[Working with communities: implementing geological disposal](#)
2. The National Policy Statement consultation will apply to England only. It will require parliamentary scrutiny by the Business, Energy and Industrial Strategy Select Committee and could be subject to a Parliamentary debate and vote.
[National Policy Statement for geological disposal infrastructure](#)
3. Higher activity radioactive waste is produced from the generation of electricity in nuclear power stations, the production and reprocessing of nuclear fuel and the use of radioactive materials in industry, medicine, research and nuclear defence.

[News story: Community projects to benefit from £45 million of HS2 government funding](#)

- community projects along High Speed Two (HS2) railway route to get a cash boost from £45 million government pledge
- HS2 Minister Nusrat Ghani visits Crewe to announce £5 million to help communities along HS2 Phase 2a from the West Midlands to Crewe
- first recipients of the Community and Environment Fund (CEF) and Business and Local Economy Fund (BLEF) are confirmed today
- fund will provide legacy of improvements along the Phase One route from London to the West Midlands

Community projects along the new HS2 railway route will receive more than £245,000 as part of a £45 million pledge by the government to provide a legacy of improvements for generations to come, HS2 Minister Nusrat Ghani announced today (25 January 2018).

A Northamptonshire pre-school, a 900 year-old Warwickshire church and an environmental awareness charity in London are amongst the first recipients of the Community and Environment Fund (CEF) and Business and Local Economy Fund (BLEF) – a £40 million fund to support local economies and communities affected by the Phase One construction of HS2 between London and Birmingham.

Today HS2 Minister Nusrat Ghani visited Crewe station to announce an extension of the scheme – with a further £5 million being made available to help communities along HS2 Phase 2a route from the West Midlands to Crewe.

[Community projects to benefit from £45 million of HS2 government funding](#)

HS2 Minister Nusrat Ghani said:

HS2 will be the backbone of our national rail network – supporting growth and regeneration and helping us build a Britain fit for the future. Whilst we know there will be disruption as we deliver one of Europe’s biggest infrastructure projects, we are absolutely committed to minimising the effects of building the new railway.

That is why I am delighted to see this significant funding helping to unlock the potential of communities and businesses along the route, ensuring the legacy of HS2 extends beyond the railway. These diverse and empowering projects will help regenerate local areas and bring people closer together, and I look forward to seeing more grants being funded in the future.

These funding allocations highlight the government’s determination to ensure HS2 is more than just a railway, but a catalyst for economic growth, driving regeneration as well as improving the transport landscape around the rail line.

The cash will be spent on public projects such as the refurbishment of community centres, nature conservation and measures to support local economies and employment.

Cathy Elliott, independent chair of CEF and BLEF said:

We have had a fantastic response so far and are proud to be supporting a variety of projects which will bring huge benefits to their communities for many years to come.

More funding is available for eligible applicants in the HS2 Phase One area and throughout the construction of Phase One. We look forward to announcing more funded local projects for Phase One and the launch date for Phase 2a applications.

Mark Thurston, HS2 Ltd chief executive, said:

As we deliver HS2, we have the opportunity to leave a positive legacy for the communities along the route of the railway. Our Community and Environment Fund, and its twin Business Fund, are starting to support important local initiatives, including building renovations and environmental projects. We’re encouraging local

people to come forward with other opportunities, such as community-led nature projects which could contribute to the 'green corridor' we're creating alongside the railway.

This grassroots activity is in addition to the national benefits of HS2, which will rebalance the economy by connecting 8 out of our 10 biggest cities, increase rail capacity on the current system and reduce journey times, while also creating thousands of jobs across the UK.

[Community projects near the HS2 route to benefit from £45 million fund](#)

The first organisations to secure CEF local grants are:

- Castlehaven Community Association in Camden, London, receiving £73,591 to support 'Greengage', a local community initiative to get more residents engaged in environmental issues
- Helmdon Acorns pre-school in Northamptonshire, receiving £5,442 to improve the safety and accessibility of the children's play area
- Thorpe Mandeville Village Hall Trust receiving £4,600 to resolve damp issues at the village hall
- Steeple Claydon Methodist Church in Buckinghamshire, receiving £12,000 to make a number of improvements to the church premises
- West Euston Partnership in London, receiving £74,804 to support 'Healthtrain', a community-led local health initiative
- Wormleighton Parochial Church Council in Warwickshire, receiving £74,982 to install toilets and catering facilities in St Peters Church

[Press release: Rules Based International System Conference](#)

The first Rules Based International System (RUBIS) conference in Seoul, part funded by Global Britain Fund discussed RUBIS in Asia with @WiltonPark and IFANS

On 22 November Wilton Park and its South Korean counterpart the Institute of Foreign Affairs and National Security (IFANS) will jointly host the first Rules Based International System (RUBIS) conference to happen in East Asia, at the Four Seasons Hotel in Seoul, South Korea. The event is co-sponsored by the South Korean Ministry of Foreign Affairs and the UK Foreign and Commonwealth Office.

The conference will bring together South Korea and the UK alongside other regional partners, that are major security and economic actors in the region,

to exchange views and thinking regarding the role of the RUBIS system and its contribution to regional stability, security and economic growth.

The event will be opened by Chancellor CHO Byung-jae of IFANS and will include speakers from South Korea, UK, Australia, Canada, Japan and China, including Vice President of the Asian Infrastructure Investment Bank (AIIB) Danny Alexander.

British Ambassador to South Korea, Charles Hay, said:

I am very excited to be co-sponsoring this important conference with IFANS. This century is the Asian century as countries in the region become more prominent on the issues that are critical for global security and economic development. Influential East Asian countries like South Korea will be instrumental in shaping the future of the international rules based order.

Additional Information

RUBIS – The rules-based international system (RBIS) is founded on relationships between states and through international institutions and frameworks, with shared rules and agreements on behaviour. It works for UK interests in multiple ways: promoting peace and prosperity through security and economic integration; encouraging predictable behaviour by states; and supporting peaceful settlement of disputes. It also encourages states, and a wide range of non-state actors, to create the conditions for open markets, the rule of law, democratic participation and accountability.

Wilton Park – Wilton Park organises over 60 events a year in the UK and overseas, bringing together leading representatives from the worlds of politics, diplomacy, academia, business, civil society, the military and the media. They focus on issues of international security, prosperity and justice. Their meetings provide a neutral environment where conflicting views can be expressed and debated openly and calmly, allowing acceptable compromise and resolution to be achieved.

Their priorities include:

- Conflict prevention, resolution and state building
- Defence and security
- Global economy
- Human rights, good governance and faith
- Multilateral institutions, key countries and regions
- Sustainable development and the environment

News story: Department for Education launches Commonwealth education pack

School Standards Minister Nick Gibb met with his counterparts from across the world today to launch a new resource for teachers, aimed at helping them to inform and explain the importance of the Commonwealth to their pupils.

The new classroom tools are for teachers working with 11 to 14 year olds and contain information on the Commonwealth and its values, accompanied by a range of classroom activities relating to topics including citizenship, geography, general studies and history.

It has been created ahead of the Commonwealth Heads of Government Meeting in April, where leaders, business, civil society and young people from around the world will gather in London to focus on a common future and helping ensure every young person can access a world-class education.

School Standards Minister Nick Gibb said:

Standards are rising in our schools thanks to our reforms and the hard work of teachers. There are 1.9 million more children in good or outstanding schools than in 2010 and our recent rise up the international rankings for reading and literacy puts our achievements on a global scale.

We are already sharing best practice internationally. Last year, I visited Australia to discuss with policy makers the evidence behind the success of phonics in teaching children to read. This included the introduction of the Phonics Screening Check to ensure all 6-year-olds are on track to becoming fluent readers. As a result of that check, our focus on phonics and the hard work of teachers, there are 154,000 more 6-year-olds on track to becoming fluent readers than in 2012.

By working collaboratively with other countries we can create ever more opportunities for young people and help build a Britain that is fit for the future.

Mark Herbert, Head of Schools Programmes at the British Council said:

As the home to one third of the world's population, 60% of them under the age of 30, young people have always been at the heart of the Commonwealth. This pack, designed specifically for primary and secondary schools in the UK, will help pupils understand the Commonwealth and why it matters to us all in an ever-more connected world.

The materials in this pack can support teaching of a range of subjects and topics across the curriculum including history, geography, economics, citizenship, art, design and personal and social education. The resources link to the Commonwealth Summit's overall theme of 'Towards a Common Future' and, at a local level, encourage pupils to contribute to a fairer, more prosperous, secure, inclusive and sustainable future for all.

The activities in the new teacher resource have been designed to be delivered collectively to form a complete lesson or individually to complement other classroom activities.

The Commonwealth Heads of Government Meeting will bring leaders from up to 52 countries spanning six continents together to ensure that the Commonwealth is able to tackle current and future challenges effectively and will focus on ensuring the Commonwealth is meeting the ambitions of young people as the organisation works towards a common future.
