

Press release: Funding for supported housing for older people to encourage building new homes

A tailored approach to protect and encourage the supply of a wide range of supported housing has been set out by government today (31 October). All long-term housing will remain in the welfare system and a proposed 'sheltered rent' for sheltered and extra care housing will keep rent and service charge at an appropriate level, protecting the housing needs of older and vulnerable people.

Local areas will be taking a bigger role in providing short-term and emergency housing through a ring-fenced grant to local authorities by April 2020, allowing vulnerable people to access secure accommodation without worrying about meeting housing costs at a difficult point in their lives. The grant will be underpinned by a National Statement of Expectation setting out how local authorities should plan effectively for provision in their area.

Supported housing provides a home to some of the most vulnerable people in this country and the vast majority is provided for older people. The government knows the supply of these homes needs to grow as this country's ageing population means that demand is forecast to increase.

Currently supported accommodation is funded through the welfare system, including the housing costs and extra support services. These reforms will ensure:

- funding certainty for the sector, and encouraging long-term investment and new supply
- local areas have a greater role in commissioning services
- councils have a stronger role in providing the right services for their local areas

Local Government Minister Marcus Jones said:

This government is committed to boosting the supply of new homes, and helping people to live independently and with dignity for as long as possible. This is why we are giving the supported housing sector the certainty of funding they need to get building new homes.

These reforms will deliver quality and value for money, funding certainty for the sector and give local areas a greater role in commissioning services.

Minister for Family Support, Housing and Child Maintenance Minister Caroline Dinenage said:

We value the important role supported housing plays and that's why we have worked closely with providers and listened to their feedback to come up with solutions that will safeguard its future and improve support for those that need a home that is safe and secure.

The new flexible funding model and reforms will give housing providers certainty over future funding and drive up quality and provide value for money.

The supported housing sector support provides homes from older renters. It also provides a home for other vulnerable groups such as people with learning disabilities, mental ill health, homeless people and victims of domestic abuse.

The government's latest [policy statement](#) is published online including further consultation on the detailed implementation of the flexible funding models for both sheltered rent and long term supported accommodation.

The [consultation](#) on the detailed implementation of the flexible funding model for supported housing will run until 23 January 2018.

Last week (25 October 2017) the government [announced](#) that the Local Housing Allowance rate will not be applied to the social rented sector.

[News story: Science and tech at core of defence as Minister launches new strategy in Birmingham](#)

By setting out specific research areas and capability priorities, like autonomy, cyber and sensor technology, the strategy will encourage defence to be even more responsive to emerging opportunities and threats, whilst promoting more innovation and collaboration with suppliers.

The Defence Minister made the announcement while visiting Small and Medium-Sized businesses (SMEs) in Birmingham, one of the UK's up-and-coming tech hubs, at EEF's brand new facility in the West Midlands.

Defence Minister Harriett Baldwin said:

This new strategy puts world-beating science and technology right at the core of our Armed Forces. Investing millions into innovative ideas from dynamic British companies will help us defend the

country in the face of intensifying threats and keep us ahead of the curve.

A world-leading centre for life sciences, Birmingham has over 36,800 digital jobs, with over 550 startups created from 2011 to 2015, making it a fertile ground for new ideas for UK Defence and Security.

Last year saw the department's direct spend with smaller business increase by over 10%. Many have benefitted from the MOD's £800 million Innovation Fund, with the department committed to spend 1.2% of its rising defence budget on science and technology.

The Defence and Security Accelerator (DASA) is one way the finances are channelled, harnessing innovative ideas to give the UK a strategic advantage in Defence and Security through themed competitions and an 'Open Call' for Innovation.

Since its launch, the DASA has assessed nearly 700 proposals from almost 400 organisations and has successfully awarded its defence portion of the 'Open Call' budget for this year.

Ideas have included computer games to help military units develop more effective tactics, a device to reduce the noise of aircraft and vehicles and a redesigned geolocation tracker.

Over 40% of submissions received were from SMEs that have not engaged with defence before, reflecting the success of the MOD efforts to make it easier for SMEs to win defence business, maximising the innovative solutions they can offer the Armed Forces.

Last month the Defence Minister announced the launch of the MOD's new Supplier Portal, which brings together for the first time a range of useful information for new and prospective suppliers in one place.

A new Twitter channel, @defenceproc, is also being used to provide regular updates to suppliers on opportunities and events that the MOD is supporting, whilst the department also launched two simplified, plain English short-form contracts for use in lower value less complex procurements last year, reducing the existing baseline terms and conditions from 18 pages to three.

The new Science and Technology Strategy will be led by the MOD's Chief Scientific Adviser Hugh Durrant-Whyte, who joined this year following a career at the forefront of the robotics sector in Australia.

[News story: APHA awarded funding for brucellosis vaccine development](#)

APHA has received \$100,000 in the AgResults' Brucellosis Vaccine Prize competition, aimed at incentivising the development of a vaccine that is effective, safe and viable for use against *Brucella melitensis* in small ruminants across the developing world.

The award is for Phase 1 of the vaccine development and was given based on the agency's scientific soundness, suitable research and appropriate manufacturing capabilities.

The team, led by Dr John McGiven, is now working on Phase 2, by developing a proof of concept vaccine that meets efficacy and safety requirements.

The [Brucellosis Vaccine Prize competition](#) is designed, funded and managed by AgResults, and implemented by the Global Alliance for Livestock Veterinary Medicines (GALVmed). The competition has three phases and could run for up to 10 years.

A total of \$30 million is available to entrants, with 3 milestone payments at different stages, potentially adding up to the total of \$26 million for one entrant. See the [competition's website](#).

Brucellosis is a costly disease that affects many animals including ruminants (for example cattle, sheep, goats and buffalo) and causes abortions, infertility and decreased milk production.

It is endemic in a number of developing countries, and the toll on smallholder farmers in South Asia and Sub-Saharan Africa is particularly devastating.

Wholesale vaccination of livestock can be a cost-effective way of controlling the disease and limiting its impact on both human and animal health.

However, the existing brucellosis vaccines are not safe or efficacious enough to use effectively in developing countries. Current vaccines are unsafe for use in pregnant animals, have variable efficacy, and can harm humans.

The most protective vaccines also cause cross reactions in diagnostic tests for the disease. A new vaccine that addresses these shortcomings would deliver lasting benefits to human and animal health.

Dr John Mc Given, R&D Project Leader at the OIE Reference Laboratory for Brucellosis at APHA said:

We feel the AgResults competition elevates recognition of the significance of this insidious and debilitating disease. For many years we have been focusing on improved methods for the

serodiagnosis of brucellosis and this research revealed to us a route towards a new type of vaccine against brucellosis. This competition gave us additional incentive to pull these innovative concepts together in the belief that we can make a big difference to brucellosis control.

Andrew Soldan, Head of APHA Scientific (the commercial services of APHA) said:

I think the prize competition is a fantastic idea; in the discussions I've already had with vaccine companies it has created a level of interest which I think is a testament to the fact that it's already started to have an effect. It's certainly raised the level of interest within the industry, both the research community and the vaccine companies.

To find out more about the award, listen to [Andrew Soldan's interview](#) on the competition's website.

[News story: Civil news: checklist for CLA escape fee claim 1 forms](#)

Checklist issued for use with CLA EC-CLAIM 1 on civil escape case billing in CLA cases.

A checklist for CLA escape cases is now available to help ensure you are paid as quickly as possible when billing for work in this area.

We decided to introduce this new checklist for consistency with the approach adopted in the other escape case categories.

Our checklists are relied on by our processing teams and were introduced to try and reduce the number of rejected claims.

But they are also useful for providers because they detail:

- our requirements
- documentation we need
- guidance on form completion and payment rules

Are there any changes to the process?

There are no major changes to the case submission requirements. The

introduction of the checklists for CLA escape cases:

- adds clarity to the process
- standardises the format and approach for all controlled work escape case claims

How to use checklists

We recommend that the checklists are used as a pre-submission check. If the checklist is correctly used the required information will be submitted for assessment and the matter will not be rejected.

If the checklist is not used and your claim is rejected, you can use the checklist to help ensure that there will be no further rejects.

News story: Call for bids – Gender Policy and Programmes Consultancy

The British Consulate General in Jerusalem is seeking bids for a consultancy position focussed on gender issues in the Occupied Palestinian Territories. The consultant will provide policy advice and make recommendations on possible gender-focussed programme interventions for the upcoming financial year, beginning in April 2018.

The successful bidder will be expected to deliver:

- Quarter 1 of the project: provide detailed recommendations on areas of gender equality policy focus for the Consulate, based on a thorough literature review.
- Quarter 2 of the project: provide a market analysis of existing gender programme interventions by international and domestic donors in the OPTs.
- Quarter 3 of the project: provide recommendations for future areas of gender-specific programming for British government's programme portfolio in the OPTs, including analysis of potential partners' capabilities.
- Quarter 4 of the project: provide further recommendations to ensure

gender is effectively mainstreamed throughout the BCG programmes portfolio.

During the course of the consultancy, the candidate will also provide advice and support for the Consulate's participation in International Women's Day.

The ideal candidate will meet the following criteria:

- A graduate degree and experience working on development and gender-focussed projects
- Experience in writing research papers and reports
- A good knowledge of legal and social issues surrounding gender in the OPTs and surrounding countries
- Familiarity with organisations active in the field of women's rights and gender issues.
- Enthusiastic, self-starter, team-player, knowledgeable about the legal and social environment of the OPTs.
- Fluent English and Arabic.
- Able to travel around the West Bank and, ideally, to Jerusalem.

Working arrangements

The successful consultant will mainly work remotely, away from the Consulate, using their own IT and other equipment. However, regular engagement with Consulate staff by telephone and in face to face meetings will be expected.

To apply:

Please send the following to: BritishConsulate-General.JerusalemHR@fco.gov.uk, no later than 23.59pm on Thursday 9 November. Late applications will not be considered.

- An up to date Curriculum Vitae which is no longer than three pages in length and includes two referees.
- A statement of suitability, no longer than one page in length.

- An example of previous written work. This could include relevant research or other policy work.
- An activity based budget. This should break down the costs of the consultancy by activity in as much detail as possible. The budget should also indicate in what month of the consultancy the expenditure is expected to occur.
- A short narrative accompaniment to the activity based budget, explaining how activity lines relate to the overall deliverables.

It is anticipated that the maximum budget for the consultancy will be £19,000, with a maximum duration of four months. The budget should cover all anticipated costs, such as transportation.

Short listed candidates will be invited to a short telephone interview on Thursday 16 November, with the selected candidate expected to start work on Monday 20 November.

On appointment, the successful candidate will be provided with a copy of the Consulate's internal gender sensitivity review of our existing programme portfolio.
