

News story: OCR English literature exam, 26 May 2017

Ofqual's statement about the error in OCR's English literature exam paper.

We are very disappointed to learn of the error in OCR's English literature exam paper today. Incidents of this nature are unacceptable and we understand the frustration and concern of the students who may have been affected.

We will be scrutinising how OCR intends to identify and minimise the impact on these students. We will be closely monitoring OCR's investigation of how this incident occurred and seeking reassurance regarding its other papers this summer.

Ofqual does not see exam boards' examination papers in advance of the tests being sat.

News story: Flypor 4% w/v Pour-on Solution – Product defect recall alert

Product defect recall alert for Flypor 4% w/v Pour-on Solution (Vm 00879/4008) by Elanco Europe Ltd.

We wish to make wholesalers, veterinary surgeons, pharmacists and SQPs aware that Elanco Europe Ltd has issued a recall for Flypor 4% w/v Pour-on Solution (Vm 00879/4008).

This issue impacts the following batch that has been placed on the UK market:

- Batch No: C681480
- Expiry Date: 10/2018

Some units in this batch have been reported to be leaking a small amount of product from around the cap due to the induction heat seals in some packs not being completely sealed to the bottle.

If you have any queries, please contact Elanco:

Tel: +44 (0)1256 353131 (Option 1) Email: ELANCOVETS@elanco.com

News story: VMD web services will be unavailable from 27 to 31 May

The following online application services will be unavailable:

[Special Import Certificates](#)

[Special Treatment Certificates](#)

You should obtain an import certificate in advance if you think you will need to import/use an imported medicine during this period.

In urgent cases you may purchase and use an imported veterinary medicine prior to obtaining a certificate from the VMD. This is a special dispensation which only applies to the VMD online system during this maintenance period.

You should obtain an import certificate retrospectively as soon as possible.

[Research Import Certificates](#)

[Export Certificates](#)

[Microchip Adverse Event Reporting](#)

[Animal Adverse Reaction Reporting](#)

[Human Adverse Reaction Reporting](#)

The following online information services will be unavailable:

[Product Information Database](#)

The systems should be operational again on Wednesday 31 May. The VMD apologises for any inconvenience.

News story: Bluetongue: UK farmers urged to be vigilant as cattle test positive in northern France

Farmers are being urged to be vigilant for signs of Bluetongue virus (BTV) and consider vaccinating their livestock after BTV-8 was detected in cattle

in a previously disease-free area of northern France.

[Bluetongue virus](#) is transmitted by midges and can infect all ruminants, particularly sheep and cattle. It can reduce milk yield, cause sickness, reduce reproductive performance or, in the most severe cases, cause death in adult animals.

It does not affect people, and meat and milk from infected animals are safe to eat and drink.

Vaccination is the best way to protect livestock and a safe and effective vaccine is available in Great Britain. Livestock keepers—particularly those on the Kent and Sussex coastline—should discuss with their vet if vaccination is an option which would benefit their business.

The holding where the virus was detected in northern France is less than 150km from the south coast of England. Farmers across the south of England in particular should look out for clinical signs of disease, including mouth ulcers; drooling; swelling of the mouth, head and neck; fever; lameness and breathing problems. Any suspicion of disease must be reported immediately to the Animal and Plant Health Agency (APHA) on 03000 200 301.

The [latest expert assessment, published today by Defra](#), is that the risk of an outbreak of Bluetongue virus in the UK is currently low, but will change as we move into summer. The risk of incursion via infected midges later in the summer depends on the level of disease on the continent, proximity to the UK, the vaccination status of animals in the UK and weather conditions.

UK Chief Veterinary Officer Nigel Gibbens said:

Bluetongue does not pose a threat to human health or food safety, but can have a negative impact on farm incomes, for example by causing reduced milk yield in cows and infertility in sheep.

We have robust disease surveillance procedures and continue to carefully monitor the situation in France, where Bluetongue disease control measures are in place.

Our latest assessment shows the risk of outbreak in the UK is currently low, but the detection of the virus in northern France is a timely reminder for farmers to remain vigilant for disease and report any suspicions to the Animal and Plant Health Agency. I would also encourage farmers to talk to their vet to consider if vaccination would benefit their business.

More information about Bluetongue—including veterinary advice and information on the vaccine—is available from the [Joint campaign Against Bluetongue \(JAB\)](#).

Regular risk assessments will be published on GOV.UK and all disease control measures are kept under review based on the latest scientific evidence and veterinary advice.

Press release: More than 300 miles of roadworks will be lifted this Bank Holiday

Almost 98 per cent of motorways and strategic A roads will be roadworks-free over the bank holiday.

Highways England is completing 184 and suspending 162 miles of roadworks by 6am on 26 May until 12.01am on 30 May.

And before they set off, to help ensure safe journeys, drivers are reminded to:

- check fuel: make sure you have enough to get to your destination
- check tyres: prior to setting off on a long/significant journey, check your tyre pressure and the condition of your tyres, including the spare – look out for cuts or wear and make sure the tyres have a minimum tread depth of 1.6mm, which is the legal limit
- check engine oil: use your dipstick to check oil before any long journey, and top up if needed – take your car back to the garage if you're topping up more than usual
- check water: to ensure you have good visibility, always keep your screenwash topped up so you can clear debris or dirt off your windscreen
- check your lights: if your indicators, hazard lights, headlights, fog lights, reverse lights or brake lights are not functioning properly, you are putting yourself at risk. In addition, light malfunctions can be a reason for your vehicle to fail its MOT

[See a map showing the locations of lifted and completed schemes.](#)

Suspension or completion of roadworks means that more lanes will be open and many speed restrictions will be lifted.

[Find out more about driving on smart motorways.](#)

Drivers planning to use the Dartford Crossing are reminded to pay Dart Charge in advance or by midnight the day after crossing, and you can find us [online at Dartcharge](#).

More information about conditions on our roads can be found on our website or by calling our information line (0300 123 5000).
