

# [Trade Remedy Authority instructed on steel safeguards measures](#)

News story

The Secretary of State for International Trade has 'called in' the TRA's reconsideration of its review into the steel safeguard trade remedy measure.

The Secretary of State for International Trade has today, 22 March 2022, 'called in' the TRA's reconsideration of its review into the steel safeguard trade remedy measure.

This call-in marks the first use by the Secretary of State of new powers established under the Trade Remedies (Review and Reconsideration of Transitioned Trade Remedies) Regulations 2022. 'Call-in' means the Secretary of State has assumed responsibility for this reconsideration and its outcome. The Secretary of State's letter calling in the reconsideration and setting out instructions to the TRA can be found on the [reconsideration public file](#) .

The TRA has been asked to conduct additional analysis at an aggregated level of steel products. This will supplement the analysis at individual product categories in the original review that regulations dictated. The Government believes that analysis at an aggregated level may better reflect the integrated nature of the steel industry, where developments affecting one product also have an impact on others.

DIT have also announced the [call-in today via a gov.uk notice](#) and published a [Written Ministerial Statement](#).

Call-in powers have been established as part of the ongoing review of the UK trade remedies framework announced on 30 June 2021 which aims to ensure that the TRA and government collectively have the abilities to defend UK industries from unfair trade practices and promote rules-based free trade. You can find out more about these powers and the review [here](#).

The TRA has worked closely with the Department for International Trade in preparing for this call-in and looks forward to supporting the Secretary of

State in completing the reconsideration, which is due to be completed by 30 June 2022.

## [PM call with Sultan of Oman, Haitham bin Tarik al Said: 22 March 2022](#)

Press release

Prime Minister Boris Johnson spoke to the Sultan of Oman, Haitham bin Tarik al Said this afternoon.

The Prime Minister spoke to the Sultan of Oman, Haitham bin Tarik al Said, this afternoon.

He thanked the Sultan and the Government of Oman for their invaluable assistance in securing the release of British nationals Nazanin Zaghari-Ratcliffe and Anoosheh Ashouri from Iran, highlighting it as an example of the UK and Oman's successful and enduring partnership.

The leaders shared their deep concerns about the brutal Russian offensive in Ukraine, agreeing that attacks on civilians must be stopped. They discussed efforts to improve global energy security in the wake of the crisis, including by boosting our existing cooperation in renewable energy and green technology.

The Prime Minister and Sultan Haitham bin Tarik also discussed regional security issues, including the conflict in Yemen, and committed to further develop UK-Omani cooperation in defence, investment and trade.

## MOD Honours the sacrifice of World War One soldiers during re-dedication services in Ypres

Both services were organised by the MOD's Joint Casualty and Compassionate Centre (JCCC), also known as the 'MOD War Detectives', and were held at the Commonwealth War Graves Commission's (CWGC) Ypres Reservoir Cemetery in Ypres, Belgium.

Nicola Nash, MOD JCCC caseworker said:

"After more than 100 years, these four men who were lost, have now been found. There is nothing more rewarding for us than giving a family closure and making sure that every soldier is remembered as he should be."

The first service was held for Lance Serjeant (LSjt) Edward Leonard Cottrell and Serjeant (Sjt) Joseph Frank Brookes Birkin whilst the second was to honour Lance Corporal (LCpl) Wilfred Horace Miller and LCpl Arthur Burton. All four served with the Leicestershire Regiment.

Serjeant Joseph Frank Brookes Birkin

Defence Minister Leo Docherty said:

"We will never fail in our duty to remember those who gave their lives in the cause of freedom during the two world wars. As more fallen servicemen from both world wars are discovered, the MOD Joint Casualty and Compassionate Centre will strive to confirm their identities. Their tireless efforts and dedication will ensure these soldiers' names will live on in the Commonwealth War Graves Commission's cemeteries."

The four soldiers had no known graves since tragically losing their lives in 1915, however, due to the collective efforts of the MOD JCCC and CWGC following evidence submitted, their final resting places have now been found over a century later.

Following submission of research, including from the CWGC, that was considered by the MOD JCCC as the adjudicators, additional research by the team themselves and the National Army Museum led to the four cases being confirmed.

Nicola added:

“Today, we honour those who paid the ultimate sacrifice, along with representatives from the regiment and their family.”

John Williamson, great nephew of Sjt Birkin, said:

“It is wonderful this work still continues; this ceremony gives final closure to the family.”

Birkin family members in prayer during the service

Research by MOD JCCC also led to LCpl Miller’s family being traced meaning they could be invited to today’s service to pay their respects.

Maria Miller, great niece of LCpl Miller, said:

“This has been the most humbling experience and a great privilege to be here today.”

Maria Miller at the graveside of her great uncle Lcpl Miller’s headstone

The services were supported by the Royal Anglian Regiment and were conducted by the Reverend (Captain) Thomas Wilde, CF, Chaplain to the Royal Anglian Regiment, who said:

“When you give a soldier a name you give them meaning a history and a voice.”

The graves will now be marked by headstones provided by the CWGC.

Fergus Read, CWGC Case Officer (Commemorations), said:

“It is always immensely satisfying when we are able to put a name on any headstone. Here, the research for one case helped us to unlock the names of those buried in a further three graves. It is the Commission’s privilege to be part of the work to identify the last resting places of these casualties, and to care for their graves in perpetuity.”

**National Highways to set out new system for connected and autonomous**

# plant at Futureworx event

National Highways will be unveiling a new industry-wide scoring system for Connected and Autonomous Plant (CAP) to construction bosses at the Futureworx event next week.

Visitors to the industry event will be given the first look at the new CAP levels which will score machinery according to its level of automation. This standardised measure, the first of its kind, will offer clarity and a clear way to compare different types of machinery to suit different tasks.

The system is the latest development in the CAP Roadmap launched by National Highways and i3P jointly in June 2020 which identified challenges and workstreams to support a goal of making automation business as usual in construction by 2035.

The new CAP levels will establish a common language and a first of its kind framework to enable connected and autonomous plant to be specified and deployed on construction schemes.

This means that all construction clients, like National Highways, can communicate clear expectations to suppliers and manufacturers can describe capability of their products using the same language.

National Highways Head of Innovation Annette Pass said:

Connected and autonomous plant offers a real opportunity to revolutionise the construction sector by making work safer, quicker and brings significant benefits for the environment.

Futureworx is the perfect platform to showcase our new CAP levels which will further our ambitious plans to introduce more connected and autonomous plant onto sites as we continue to develop the roads of the future.

CAP has the potential to improve productivity by more than £200bn by 2040 in the construction sector and we are committed to making it standard industry practice. By establishing more collaborative relationships with innovators and academics we hope to continue to lead in this field.

The term Connected and Autonomous Plant refers to construction plant that is connected to its environment through sensors or wireless transfer of data between a remote operator while the autonomy element refers to aspects of the vehicle's operation and also movement around a site.

The new CAP Levels Maturity Matrix offers a standardised scoring system that enables plant and machinery to be scored according to its level of automation.

An example of currently available technology is Intelligent Machine Control which guides excavators to dig to precisely the right level and profile, meaning more efficient and easier working for machine operators. In future the operator may not need to be in the vehicle and could even control it from the other side of the world.

The roadmap and the CAP levels have been developed in collaboration with TRL – the UK-based global centre for innovation in transport and mobility – as well as i3P, Costain and over 75 industry stakeholders meaning they have been shaped by those who will be guided by them.

The ongoing digital revolution in the construction industry can increase productivity dramatically and generate billions of pounds in savings. At the same time, digital transformation can reduce disruption to the public and improve safety.

Digital technologies are increasingly being introduced in construction and opportunities arise to introduce new techniques such as automating some activities that require manual labour and human intervention but also involve risk.

National Highways' [Digital Roads strategy](#) sets out:

- the company's Digital Roads 2025 vision for safer and greener roads
- how the growth of digital technology and the move to electric, connected and autonomous vehicles will fundamentally change roads in the future.

The Futureworx technology showcase is taking place on 30 and 31 March 2022 at the East of England Arena, Peterborough.

Futureworx will bring together industry professionals keen to find out what is in the pipeline of ideas and technology which will shape tomorrow's construction equipment experience. The two-day event will also include conference sessions, live product demonstrations and technical talks.

Members of the public should contact the National Highways customer contact centre on 0300 123 5000.

Journalists should contact the National Highways press office on 0844 693 1448 and use the menu to speak to the most appropriate press officer.

## [PM call with Prime Minister Modi of India: 22 March 2022](#)

Press release

The Prime Minister spoke to Indian Prime Minister Narendra Modi this afternoon.

The Prime Minister spoke to Indian Prime Minister Narendra Modi this afternoon.

The leaders discussed the grave situation in Ukraine, and the Prime Minister said he believed the actions of Putin's regime were deeply disturbing and disastrous for the world.

The pair agreed that Ukraine's integrity and territorial sovereignty must be respected.

Russia needed to adhere to the UN Charter, the leaders said, and both agreed that respect for international law was the only way to ensure global peace and prosperity.

Prime Minister Modi updated on India's support for the humanitarian situation in Ukraine, and the Prime Minister said the UK and India should intensify efforts to promote peace and de-escalation in the region.

The leaders welcomed India and the UK's strong and prosperous relationship, and agreed to continue to build on trade, security and business ties in the coming weeks and months. They looked forward to meeting in person at the earliest opportunity.
