

[News story: Foreign Secretary to visit Russia](#)

The Foreign Secretary has accepted an invitation from Russian Foreign Minister Sergey Lavrov to visit Moscow in the coming weeks.

The Prime Minister and the Foreign Secretary have made clear that our policy towards Russia is to 'engage but beware' and the visit is entirely consistent with this approach.

Discussions will focus on the UK-Russia relationship and current international issues including Syria and Ukraine, where we continue to have significant differences. This is not a return to business as usual and the Foreign Secretary will continue to be robust on those issues where we differ.

We have always been clear that the UK will engage with Russia where it is in our national interest to do so.

Details of precise timings will be confirmed in due course. A potential visit has been in the pipeline for some time, with the Prime Minister and President Putin discussing this when they met in China in September 2016.

[This business rates revaluation has exposed the fundamental flaws in this outdated system of taxation – Teresa Pearce](#)

Teresa Pearce MP, Labour's Shadow

Secretary of State for Communities and Local Government, responding to the IFS analysis of the business rates revaluation on local authorities, said:

"This business rates revaluation has exposed the fundamental flaws in this outdated system of taxation. Those flaws will be further magnified once 100% business rate retention comes into effect.

"Our high streets are already struggling – and this revaluation will signal the end for many small businesses, such as independent pubs at the heart of

community life.

“The current system means that councils won’t see a sharp increase in their revenue – but once 100% retention kicks in, some councils may be rolling in cash whilst others are left out in the cold.

“Businesses and councils need far more support and stability than the Government is currently offering. The Government must re-evaluate the business

rates system and produce something which works for communities across our regions and the businesses they rely on.”

Labour welcomes House of Commons Select Committee calls for mission-based industrial strategy

The non-partisan House of Commons select committee for Business, Energy and Industrial Strategy has today released a report calling for a new mission-based approach to industrial strategy. The select committee’s report criticises the Government’s sector based strategy for ‘picking winners’ and for lacking ‘meaningful metrics’ to determine success.

In its report the select committee backed the ‘mission-based’ approach to industrial strategy, which is also advocated by the Labour Party. Labour’s industrial strategy will be challenge-led, mission-oriented and values-driven – providing a long-term vision for the economy that mobilises both public and private investment.

Chi Onwurah MP, Labour’s Shadow Minister for industrial strategy, commented:

“This report reaffirms what we’ve been saying all along: cherry-picking favoured sectors for backroom deals is no substitute for a real long-term vision. Theresa May says she wants to see a high-wage, high-growth economy, but public investment has fallen to half the amount it was under Labour and her sectoral approach is leaving the vast majority of British workers out in the cold.

“Labour’s industrial strategy will be led by the big challenges of our time, from decarbonizing the economy to caring

for an ageing population. Rather than taking a scatter-gun approach to sectors and technologies, we're setting out key missions, such as drawing 60 per cent of our energy from low carbon sources by 2030."

Ends

Notes to editors:

An article by Iain Wright MP, who chairs the select committee, summarising the report's findings can be found here: <http://www.thetimes.co.uk/article/very-little-industry-and-still-less-strategy-wdt7f99wd>

GCSE 9 to 1 grades

The new 9 to 1 GCSE grades

The vast majority of students taking GCSEs in England in 2019 will receive grades from 9 to 1. Students taking 5 lesser-taught GCSE subjects (Biblical Hebrew, Gujarati, Persian, Portuguese and Turkish) will receive letter grades in 2019 before they become numerical (9 to 1) in 2020.

9 things to know about the new GCSE grades

1. GCSEs in England have been reformed and are graded with from 9 to 1, with 9 being the highest grade.
2. GCSE content is more challenging.
3. Fewer grade 9s are be awarded than A*s.
4. The new grades are being brought in to signal that GCSEs have been reformed and to better differentiate between students of different abilities.

5. In the first year each new GCSE subject has been introduced, broadly the same proportion of students get a grade 4 or above as would have got a grade C or above in the old system.
6. These changes are only happening in England. Wales and Northern Ireland are not introducing the new 9 to 1 grading scale as part of their changes to GCSEs.
7. English language, English literature and maths were the first to be graded from 9 to 1 in 2017.
8. Another 20 subjects had 9 to 1 grading in 2018, with most others following in 2019. During this transition, students received a mixture of letter and number grades.
9. You can see how the 9 to 1 grades compare with the A* to G scale in our [GCSE grading postcard](#).

GCSE science

GCSEs for science have changed in England. Students taking separate science GCSEs now get a grade from 9 to 1 in each subject. Combined science draws content from all three subjects and students receive an award worth two GCSEs, consisting of two equal or adjacent grades.

5 things to know about combined science GCSEs

1. Students taking separate science GCSEs get a grade from 9 to 1 for each subject, with 9 being the highest grade.
2. Students studying combined science receive an award worth two GCSEs, consisting of two equal or adjacent grades from 9 to 1 (9-9, 9-8, 8-8, 8-7, 7-7...to 1-1).
3. If the numbers are different, the highest number will always be reported on the left.
4. Students do at least 8 practical activities (16 for combined science) covering specific apparatus and techniques.
5. Exam questions about practical work make up at least 15% of the total marks for the qualification.
